

"Heat Transfer with MATLAB" Tutorials . Download Instructor Lecture Slides (.zip) . Heat transfer: lessons with examples solved with MATLAB. Design and debug a numerical circuit. Chapter 3 describes how to do this and shows how you can build a numerical circuit and use it to develop a solution algorithm without programming. In this chapter, you will use numerical schemes that can be easily copied and applied to other algorithms. Later in this chapter, we will learn how to create our own numerical circuits, and then how to develop algorithms to solve complex problems using numerical circuits.
