The new version of Medlin General Ledger eliminates the need to manually enter monthly transactions with unmatched check entry and reconcile report. The 2007 version of Medlin General Ledger is a universal system. It's designed to handle a single set of bookkeeping for a client or multiple clients. It can handle one, two, or three clients. All reports can be printed, e-mailed, viewed on screen, or saved as a text file. Reports can be reprinted at ANY time during the year. Need to reprint January's Income Statement in June? Medlin General Ledger can do it! The

2007 version of Medlin General Ledger provides even more options. It can be set up to print reports for a single period, or a sequence of consecutive periods, which can be set up to use as a reference for the entire year. All transactions in the current and prior year are available for editing and reprinting. Context sensitive help screens are available at all times. The Bank Reconciliation feature allows you to enter transactions for the current month as well as the prior month. You can even enter the full amount as a negative balance. Thus, you can also print a check register showing the negative balance. The transactions for the prior month are

carried over in a backup file so you can edit and reprint. The Interface allows for easy sorting and printing of all transactions. Some of the other features of Medlin General Ledger 2007 are:

- ☐ Reports can be printed for the current month or any sequence of consecutive months.
- ☐ All transactions in the current and prior year are available for editing and reprinting.
- ☐ Prints reports for a single period or any combination of consecutive periods.
- ☐ All reports can be printed, e-mailed, viewed on screen, or saved as a text file.
- ☐ Reports can be reprinted at ANY time during the year. Need to reprint January's Income Statement in June? Medlin
