Photoshop offers lots of online tutorials for free. Just head to for more information. Note that Adobe's name has become a verb, so people use Photoshop for many other things, including web design. This book is about Photoshop, though. Photoshop has a somewhat fragmented reputation. If you're a computer user, you may have an opinion about what's good or bad, and if you're a designer, you may be under the impression that Photoshop is only for creating professional images. Photoshop is primarily a design tool, but it certainly does have uses in photography and other industries. Photoshop also has a rough reputation because of its known vulnerabilities. Despite a concerted effort by Adobe to keep vulnerabilities from leaking out, the image editing program is constantly being upgraded to include new features and fix holes. Sometimes, updates introduce new issues or bugs.

In this book, we discuss the basic tools and techniques you need to know for the work of a graphic designer and we work through the latest changes. We feel that this updated information is essential to designers because it enables them to create and deliver consistent, high-quality graphics for their clients. In an effort to further improve the Photoshop experience for professional designers, Adobe overhauled most of the features in Photoshop CS6 (version 6) so that designers can get quicker results and can create better, more professional-looking designs. In addition, the new version offers many new features, such as selection tools and content-aware tools. This book focuses on Photoshop CS6 and up, which uses the 8-inch (20.3cm) by 11-inch (27cm) (A4) paper size. For information about using Photoshop on small devices like tablets, small smartphones, and so on, you can check out the following book: *The Art of iPhone and iPad Graphic Design*, published by Wiley. ## General Overview of Photoshop Photoshop is a fairly complex program, and this book is packed with information. However, you don't need to be a guru to get by with this program — and for most tasks, you don't need to be a pro. The program is really designed to handle only those tasks that professional designers face. For now, take a look at a general overview of how Photoshop works, and check out the various tools you use to create projects.

Q: Is it possible to hide an image with a custom height and width but with an aspect ratio of 1:1 I want to hide an image with a custom height and width but keep the aspect ratio of 1:1. This is what I have tried so far. However this is not working...
\$('#'+id_1).css('visibility', 'hidden'); \$('#'+id_2).css('visibility', 'visible');

A: Use CSS3 to define height and width using percentage. It will make your image look like when you change the height/width to suit your content and give the aspect ratio of the image accordingly Example: `img { height: 100%; width: 100%; } #... { height: 100%; width: 100%; } #... { width: 400px; height: 200px; }`

Fifteen parks took part in the show, with more than 160 entries from 150 gardens. Commenting on the 2017 show, curator, Declan O'Reilly, said: "This year the show has been challenged by the current environment. We started with the virus, but found that we were still able to come up with some really exciting entries. It was challenging, but I'm pleased that we have had some really challenging entries. "There have been some really excellent entries, and some of the garden designers have used plants sourced from established urban gardens, the British Ecological Society organisation, and some gardens on the islands. We had a really varied range of garden styles." There were some really spectacular entries. The hollies won the top award for their spectacular images, with White Holly being awarded the overall award, and the show had a record number of entries this year, particularly from experienced gardeners. "There has been a massive boost in the number of entries over the last 12 months," commented organisers. "We had around 30 extra entrants this year, and that's more than we had at the same stage last year. With the current epidemic, gardeners are really focussing on creating and exhibiting. We want to encourage people to share their creativity, and to draw on what they have learnt in this era of lockdown." The winning 'Paradise Found' entry was created by Ann Holloway at Peace Gardens (Lancaster), and consisted of fuchsia, peonies and white calla lilies, with a lot of different wall and boundary features, to create a colourful display. Ann made use of a range of resources, including purple rock lobelia from White Heather, and a bronze coloured kiawe from Macho Bustos. The Swan's Nest, created by Linda and Rob Butler at Swan's Nest (Stratford), contains ferns, sweet peas, snow poppy, rhododendrons, sissinghurst roses and a lot of gravel.
