But now that these conditions are understood better, they are recognised as completely different. In fact, being "autistic" doesn't make you more likely to have cerebral palsy, but having cerebral palsy increases your risk of having autism. However, you can certainly suffer from both. What's new:

, or so I thought, when I purchased the game and climbed my way up the Yamabato Tower. At the top of the tower were a bunch of...doors. None of them seemed like they were actually leading anywhere, but all of them were locked. So, I kept on moving up. Beyond the doors of the previous towers, the walls of the maze started shrinking, creating a funnel that began to become more claustrophobic by the second. Often, the door of every tower you clear open a way into the trap of another tower, different in architecture, colour, and size. This maze is cursed. I don't expect you to believe me though, because you already saw this coming. The rooms of a maze like this are so full of clues, so full of hints and hints of gates and gates, that it's almost impossible to get lost. That is, until you reach the last dungeon. The door's a'bomatix: At this point, I was really confused, but before I could ask around I was thrown in the middle of a fight. After beating the Black Dragon this maze is patrolled by another boss...I thought he might be the sixth maze boss, but I was wrong. Kerma: The Phantom! So, I attacked, but the boss got better and better at sending me flying with my own attacks back at me. Soon enough I realised I didn't have any MP to spare and he wasn't stopping. I turned to the side to dodge a blast, figuring I'd dodge the rest later. That was when I realised he just pushed my next attack into me. My butt ended up on a boss. Berserk: When I was in Maiden: The Fallen Princess, the boss of the fifth maze called out to me, named Kerma, to say hello. At this point, I thought about it for a moment and decided to go for his heart - but before I got it, he absorbed the attack. So, you know what I do. The Phantom: THE, eh, the Phantom returned there, along with a host of things from Kosen! A sheer black katana, the size of a catcher's mask, he raised, but I dodged. A blade of mercury, a ball of cold iron, a giant gauntlet covering
